Research on Enterprise Systems of Systems as Complex Systems

Develop methods, processes, and tools that

Model

.... allow quick and insightful modeling of enterprises/SoS so that the effects of changes in policies, practices, components, interfaces, and technologies can be anticipated and understood in advance of their implementation

Acquire

.... allow insight into enterprise/SoS acquisition approaches in the face of significant uncertainty and change to minimize unintended consequences and unforeseen risks

Evolve

.... facilitate evolving and growing an enterprise/SoS, including insight into different architectural and integration approaches that facilitate evolution in the face of uncertainty and change in how an enterprise/SoS is employed, the technologies available to realize it, and the environment in which it exists

Verify

..... allow the properties of an enterprise/SoS to be anticipated, monitored and confirmed during development and evolution, including an enterprise/SoS which includes legacy
Panel Members

- Judith Dahmann, MITRE Corporation [Chair] jdahmann@mitre.org
- Dan DeLaurentis, Purdue; ddelaure@purdue.edu
- Michael Pennock, Stevens Institute of Technology; mpennock@stevens.edu
- Mark Blackburn; Steven Institute of Technology; mblackbu@stevens.edu
- Cihan Dagli; Missouri Institute of Science and Technology dagli@mst.edu

SE Research Center (SERC) thrust in Enterprise Systems of Systems
